BARRIER BACKED COMPOSITES

SOUND ABSORBER + NOISE BARRIER.

BBC products are a highly versatile noise control solution that utilizes a fiberglass absorber bonded to a reinforced loaded vinyl noise barrier. They offer exceptional performance for almost any outdoor application.

BBC-13X & BBC-13X-2" MOST SPECIFIED.

BBC-13X and 13X-2" panels are arguably our most popular and widely used exterior sound curtains. They combine the benefits of both a noise barrier and sound absorber in one product. Typical applications include use on construction sites or as temporary enclosures around loud equipment.

BBC-13X-2LB-2" FIRST IN CLASS.

In addition to being Class A fire rated, the BBC-13X-2LB-2" offers a minimum lifespan of 7+ years when properly installed. Offering excellent acoustic performance and suitable for a broad range of temperatures, this curtain is first in class.

soundseal.com/bbc13x

BBC-EXT-R & BBC-EXT-R-2" LONG TERM SOLUTIONS.

These UV-resistant, heavy-duty exterior sound curtains can be used as modular curtain panels or in an array for permanent outdoor applications or long-term construction site noise control.

soundseal.com/bbc-exterior

BBC-EXT-N-2" MOST ECONOMICAL.

The BBC-EXT-N-2" product combines a money saving, non-reinforced noise barrier with UV and tear resistant exterior grade faced quilted fiberglass sound absorbers. The product is available as finished curtain panels or in roll form with edges bound or unbound.

QUILTED FIBERGLASS ABSORBERS

BE A GOOD NEIGHBOR.

Exterior Grade Quilted Fiberglass Absorbers are used to reduce reverberant noise on outdoor noise sources such as enclosing HVAC equipment, dust collectors or similar. Typical applications include installation on brick or masonry wall structures or solid wood fences.

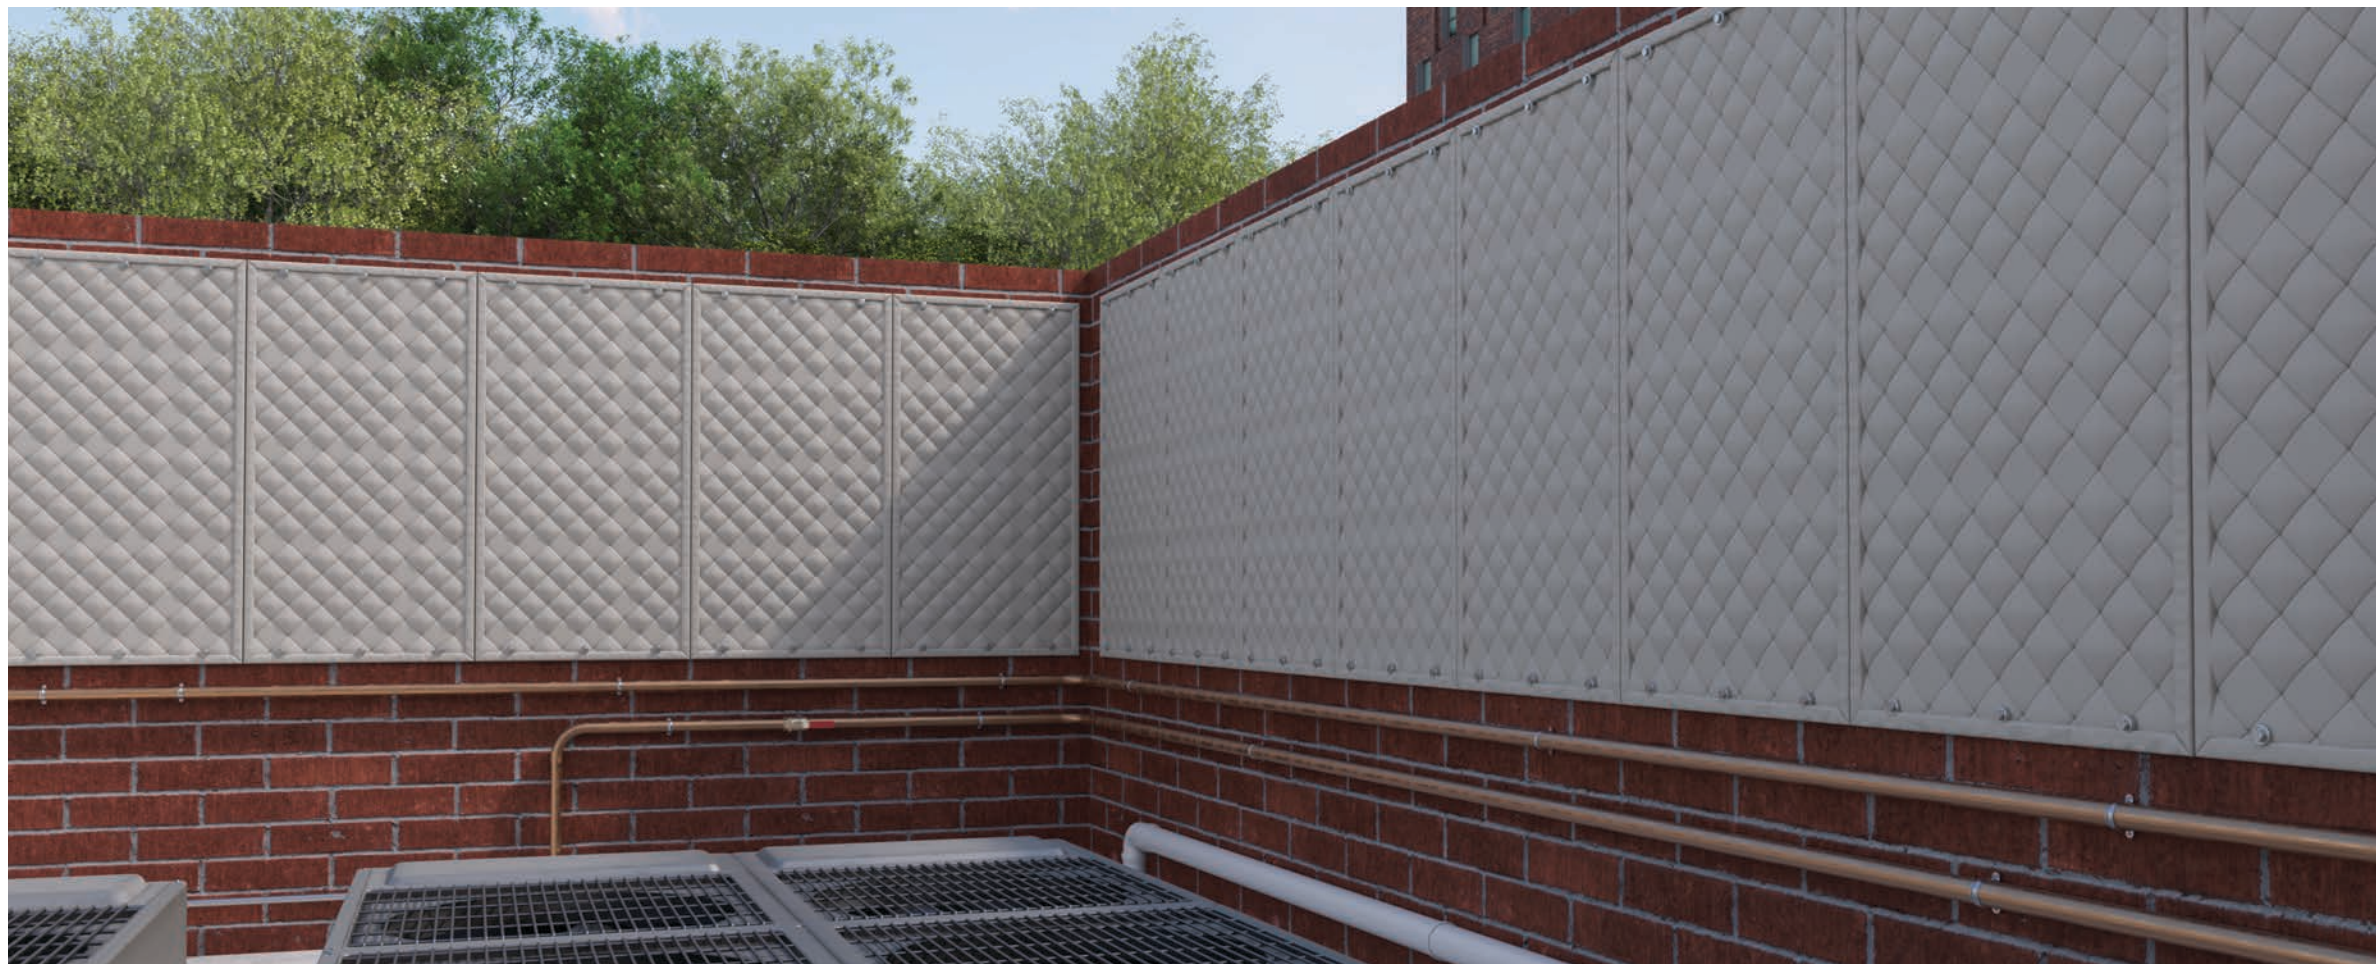

QFA-EXT-D-2"

HEAVY DUTY.

The QFA-EXT-D-2" product offers excellent broadband noise absorption ratings and is the most widely-used product in the line. All curtains are custom made with standard sizes of 48" x any desired length up to 25'. Custom curtain sizes and bound or unbound rolls are also available.

soundseal.com/qfa-ext-d2

QFA-EXT-2"-S LOW PERMEABILITY.

Our QFA-EXT-2"-S can be used to reduce the reverberant noise energy in an enclosure, room or building and is commonly installed over walls adjacent to a job site or noisy machinery. These curtains offer a moisture permeability of up to 0.5 perms.

VIVID® DESIGNER SERIES

QUIET, IN COLOR.

Add some color to outdoor and manufacturing spaces with the Vivid line of versatile, exterior-grade noise barriers and sound curtains. Available in 12 vibrant hues, they are equally durable, effective and visually stunning.

VIVID BBC-2"

ACE YOUR OPPONENT & YOUR ACOUSTICS.

Pickleball strikes and sneaker squeaks are no match for Vivid BBC-2". Offering the benefits of both a noise barrier and a sound absorber, these curtain panels keep the focus on the match — not noise from game play.

soundseal.com/vivid-bbc-data

VIVID QFA-2" MAKE A SPLASH WITH COLOR.

Pool parties just got a little more colorful – and quiet – with the help of Vivid QFA-2". These sound curtains consist of a durable indoor/outdoor rated facing quilted to both sides of a 2" thick fiberglass noise absorber.

soundseal.com/vivid-qfa-data

VIVID BSC-2"

A SLAM DUNK.

Vivid BSC-2" barrier septum composites are easy to install, durable, tear and abrasion resistant. In addition to offering great UV and mildew resistance, they are dimensionally stable and will not sag or stretch over time. We'd call that a slam dunk.
